Correction to: Individual socioeconomic position, neighbourhood disadvantage and mental well-being: a cross-sectional multilevel analysis of mid-age adults

Emily M. Mann^{1*}, Kristiann C. Heesch¹, Jerome N. Rachele², Nicola W. Burton^{3,4} and Gavin Turrell⁵

Correction to: BMC Public Health 22, 494 (2022)
<https://doi.org/10.1186/s12889-022-12905-7>

The original publication of this article contained 2 typo's in the abstract. The incorrect and correct information is shown in this correction article [1]. The original article has been updated.

Incorrect

- This study **aims** to explore the relationship between individual socioeconomic position (SEP), neighbourhood disadvantage and mental well-being in mid-age adults.
- Multilevel modelling was used to analyse data collected from 7866 participants from the second (2009) wave of HABITAT (How Areas in Brisbane Influence health and activity), a longitudinal study (**2007–2018**) of adults aged 40–65 years living in Brisbane, Australia. Mental well-being was measured using the Warwick Edinburgh Mental Well-Being Scale (WEMWBS).

Correct

- This study **aimed** to explore the relationship between individual socioeconomic position (SEP), neighbourhood disadvantage and mental well-being in mid-age adults.
